**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_\_.
- 2a) ☐ This action is FINAL.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Specification***

1. Applicant is requested to update the continuity data added to the first page of the specification in the preliminary amendment.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 11, 12, 15, 16, 19, 20, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Mahnig (German 3823442).

As shown in the drawing figure, the hub body 9 and the flange 8 form a concave surface in which is disposed a reinforcing rib (unlabelled) on both the outboard side and the inboard side of the flange.

4. Claims 11, 14, 16, 18, 20, and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Booth.

The hub body 1 has a flange 4 and a plurality of tapered ribs 7 extending between the body and the flange.

5. Claims 11, 12, 15, 16, 19, 20, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Steiner (US Patent No. 4,811,992).

As shown in figures 2 and 4, ribs (unlabelled) extend between the hub body and the radially extending flange.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 13, 17, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steiner '992.

For the inboard side of the radial flange 14 to define a smooth continuous curve, instead of the somewhat straight portion as shown, would have been obvious to those of ordinary skill in the art as a mechanical expedient as this would facilitate casting of the flange.

Art Unit: 3617

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show other wheel hubs having ribs extending between the hub and the flange.
